

There's 1 ulceration for every 15 High Risk Callused patients² so... Prescribe Dermatronics with certainty¹

Four real examples of treatment

1 Day

Less than one day apart these photos of a patient with Diabetes show a rapid improvement*

5 Days

Just 5 days apart – a highly visibly improvement in a patient for whom previous treatments had been unsuccessful, (this lady with Diabetes had burn scars on her feet) all the callus is removed*

7 Days

7 days apart – again, using Dermatronics just once a day, all callus is removed*

14 Days

Even on open splits Dermatronics Heel Balm is highly effective after only 14 days†

Cream must be applied around, not in, the splits
